

Revision Techniques

Mind Maps Flow Charts

Information can be seen quickly and act as a visual aid.

They help you remember links and connections and strings of information.

Put them around the house for regular revision.

Look online for examples or at the 'Learning Mats' for inspiration.

Repetition

It's all about 'rehearsal'!!

You want to move all the stuff that you learn in lesson and revising from your short term memory into your long term memory.

Regular repetition of knowledge will strengthen it.

Be The Teacher!

Select a subject, then select a victim (friend or family member is good).

Teach your victim everything you know about a topic – see if they can explain it back to you.

You can also get your 'victim' to ask you questions about that topic.

This is a great way to identify any gaps in your knowledge.

20 Questions

Write and answer 20 questions on any topic. Be creative about how you present your answers...mindmap...index cards....cartoons.....songs....

Keep writing and answering 20 more questions until you have exhausted your knowledge!

You need to summarise your notes.

You need to learn your notes.

Be Creative

Mix It Up!
